

Group discussion consent statement

Dear Parent/Guardian

FLAS and Pact would like to engage with your son/daughter to have an informal (and confidential) discussion on how to improve their health and protection from HIV. The information generated from this exercise will be used to design adolescent friendly HIV prevention, care and support programs and services. The focus group discussion will be facilitated by FLAS and Pact staff and will take about 2 hours. None of the responses provided in the Focus Group Discussion will be associated with any of the individual adolescent.

In addition there are no costs for participating in this focus group discussion. Refreshments and bus fares will be provided by FLAS and Pact. Taking part in this group discussion is entirely voluntary. Your child will be free to refuse to answer any questions and can opt out of the group discussion at any time.

Are you approving your child to participate in the focus group discussion?

(Tick where appropriate) Yes No
